

Ductile Iron - A Deeper Dive

Beyond the Basics with Real-World Examples from the Jobsite & HDD

Zoom, Virtual – 3/12/26 @ 8:00AM-10:00AM

2.0 BLWSO TCHs / 2.0 DEP TCHs

Training Overview

Looking for something that goes **beyond the basics** on Ductile Iron Pipe? Then this session is for you!

This training is designed for beginners and seasoned professionals alike. Join McWane Ductile and TWS as we take a deep dive into practical in-field solutions, jobsite case-studies, do's & don'ts, and installation/testing.

The training will also include horizontal directional drilling before finishing with a Q&A. **Register today!**

Agenda & Topics

Real-world, practical solutions with DIP

Jobsite case studies & best practices

Do's & Don'ts with Installation and Testing

Horizontal Directional Drilling (HDD) & Q&A

Series Registration Fees

\$65.00/person

Certificates will be sent after training

YOUR INSTRUCTOR:

- **Ken Rickvalsky, *McWane Ductile***

Ken has been a National Product Engineer for ductile companies for 35 years, the last 22 with McWane Ductile. He provides engineering design support, troubleshooting, field assistance, and guidance. Simply put, if it's happened to a utility piping system, he's seen it!

Ken is well-known for his energetic and engaging presentations focusing on real-world examples.
