# Train with Us

Page

3

## Operator Exam Prep

Our exam prep courses are guaranteed to help attendees prepare for all levels of water and wastewater licensing exams. These are our most popular programs for a reason!

4

## Emergency Preparedness

Through scenario-based training - like tabletop exercises and drills - we can prepare for real-world drinking water and wastewater emergencies, such as contaminations, flooding, cyber, & more.

5

## Safety

Safety topics range from Confined Space to Excavation/Trenching to Work Zone Traffic Control and more. Programs can also help meet required annual OSHA/DOL training and refresher training.

6

## Operation & Maintenance

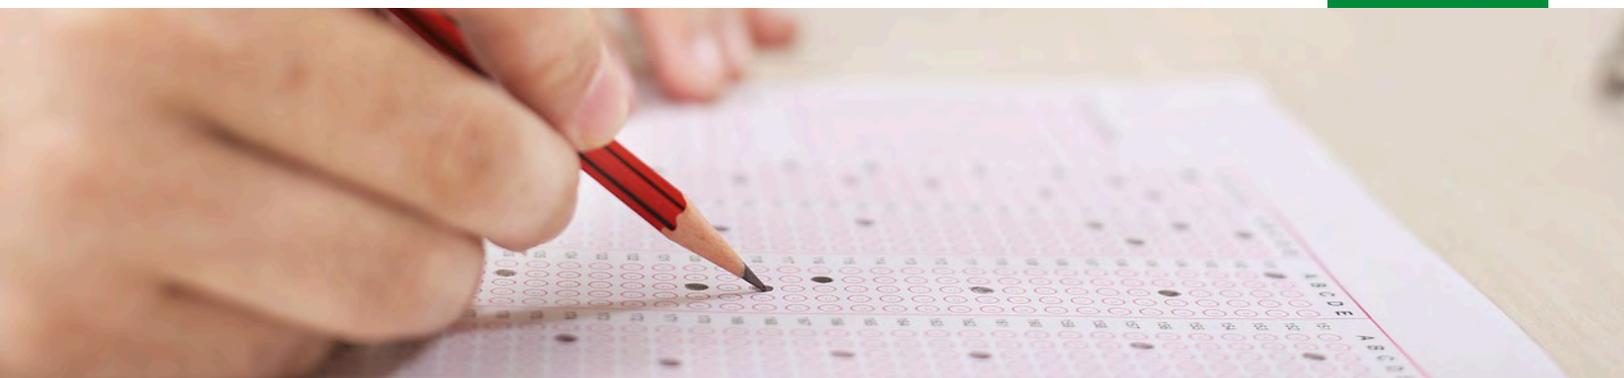

From chlorine analyzers to surface water treatment to pumping systems and everything in between. These programs are developed from first-hand experience working at utilities and water systems.

# Operator Exam Prep

Courses are available as standalone or combined programs (e.g., Treatment Class I or Treatment Class I & II combined). Single-day review and more tailored courses are also available.

**Our Guarantee:** *A free tutoring session to attendees if they don't pass their exam after taking a full prep course with us.*

- **Small/Very Small Water System** Operator Exam Prep
- **Water Treatment** Class I
- Water Treatment Class II
- Water Treatment Class III
- Water Treatment Class IV
- **Water Distribution** Class I
- Water Distribution Class II
- Water Distribution Class III
- Water Distribution Class IV
- **Wastewater Grades 1 & 2**
- **Wastewater Grades 3 & 4**
- **Math for Operators** (Basic, Intermediate, and Advanced)
- **Operator Exam Tips & Tricks**
- Individual & Group Tutoring

# Emergency Prep

Most programs require full-day schedules (6 hours of training content) but shorter options are available upon request. Cybersecurity training is primarily offered in virtual 2 or 3-hour sessions.

- **Emergency Tabletop Exercises (TTX)**

TTX topics range from contamination to cybersecurity to flooding to severe storms and more. Focus is on 3 steps: prepare, respond, and recover. TTXs come with **After Action Reports (AAR)** for attendees to bring lessons-learned back with them.

- **Cybersecurity** (beginners, intermediate, and advanced)
- **Flooding Resiliency:** Keeping Your Head Above Water
- **Planning for the Inevitable:** Preparing for & Responding to Emergencies
- **Other Custom Topics** (Business Continuity Planning, Source Water Protection, Emergency Response Plans, SOPs, etc.)

# Safety Training

Our highly experienced instructors provide annual OSHA/DOL safety training, refresher programs, and topic-based safety courses. Most of the following subjects are available as standalone or bundled together for full-day programs.

- Accident Reviews
- Arc Flash Awareness
- Bloodborne Pathogens
- Chainsaws
- Chemical Safety
- **Confined Space** Entry
- Confined Space Rescue
- CPR, First Aid, AED
- Emergency Action Plans
- **Fall Protection**
- Fall Retrieval
- Fire Extinguishers
- Fire Prevention
- Flagger Training
- Forklift Operation
- Harassment Prevention
- Hazard Communications
- Hearing Protection
- Industrial Fire Brigade
- Infection Control
- Laboratory Safety
- **Ladder Safety**
- Lockout Tagout
- Personal Protective Equipment
- Respiratory Protection
- **Trenching & Excavation**
- Wastewater Exposure Control
- **Work Zone Traffic Control**

Our **most popular** topics are: Confined Space, Fall Protection, Trenching & Excavation, and Work Zone Traffic Control.

# Operation & Maintenance

Our operations & maintenance courses were built from **years of work at water and wastewater systems**. Below is a sample of some of our most common programs offering TCHs. We can also create custom topics. **Note:** most courses are available in-person, virtual, or hybrid with variable lengths.

- **AI in Action:** Smarter, Safer, Simpler (ask us how AI can help you)
- **Basic Water Chemistry & Chlorine Analyzers**
- Cross Training & SOPs
- Effective Utility Management
- Fundamentals of Distribution & Collection
- Fundamentals of Water & Wastewater Treatment
- Ground Water Rule
- **Ground/Surface Water Treatment Day**
- Lead Copper Rule
- Level 1 & 2 Assessments Under RTCR
- **Opening & Closing for the Season** (Seasonal Systems)
- Real-World Problem Solving for Operators
- **Revised Total Coliform Rule: The Find It & Fix Approach**
- So, You Think You Know Distribution/Collection Systems: Jeopardy
- So, You Think You Know Treatment Systems: Jeopardy
- "Water" You Waiting For: **EPA Safe Drinking Water Act**

# Our Instructors

## Tom Bahun II

Tom co-founded TWS with his son. He is a licensed Class IV water & Grade 5 wastewater operator and certified instructional trainer, specializing in operator cert prep & tech assistance.

## Dan Bahun

Dan joined the TWS team in 2021 and helps utilities with emergency response, source protection, and rate cases. He is a Class IV water operator and offers operator prep as well as exam tips/tricks.

## Tom Denison

Formerly of Life Safety Specialists, Tom Denison partnered with TWS in 2025 to offer health, safety, and workplace training, such as Confined Space, Annual Safety Training, and Refresher Programs.

## Thomas Bahun III

Thomas co-founded TWS with his Dad and helps clients with risk assessments, cybersecurity, website design, and project management. His courses focus on regulations, AI, and cybersecurity.
